INSTITUTE**

The Art & Science of Machinery & Equipment Appraisal

What's It Really Worth?

Since the answer to that question often affects our most important decision, it makes good sense to use a professional appraiser. Estimating the value, at any given time, of any sort of property, requires skills and training. That kind of savvy comes through fulltime experience.

An error in judgment in appraising your machinery and equipment can be costly. That's why our appraisers are certified by the National Equipment & Business Brokers Institute and are authorized to use the professional designation CMEA.

Who Needs This Service?

- Bankers need certified M&E appraisals in support of loan decisions
